Introduction

Why Use Self Picks?

Our web-based tool simplifies the process of cataloging and showcasing products at exhibitions. It enables exhibitors to easily upload detailed product information, reducing the need for in-person explanations.

1. **Eliminate language Barriers**
2. **Seamless Product Access**
3. **Time-Saving for Exhibitors**
4. **Valuable Insights:**
5. **Easy Product Listing from Smartphone**
6. **Self Picks History**

Enhance your exhibition experience with a smarter, data-driven approach. Let's explore the merits of Self Exhibition feature into detail.

Eliminates Language Barriers

Self Pick Tools is designed to assist multilingual Support. This works as a bridge to gap the distance between different cultures and ethnicity.

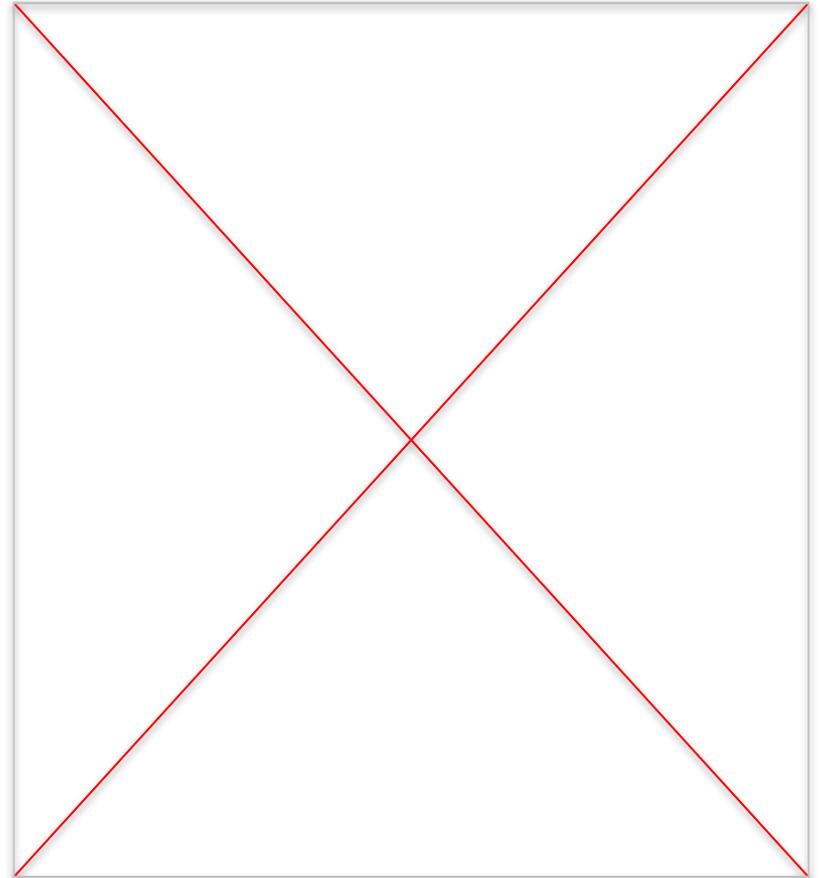

Multilingual Signage: Our Feature is designed to assist multi language support. We can use it with English, Japanese and Hindi Language support.

Global Connectivity: Our Self Picks Feature facilitates better understanding in international interactions, fostering Collaboration among people with various .

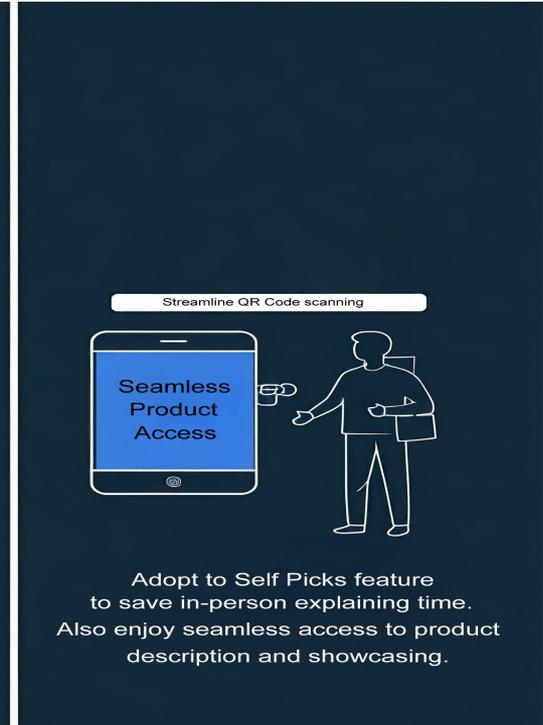

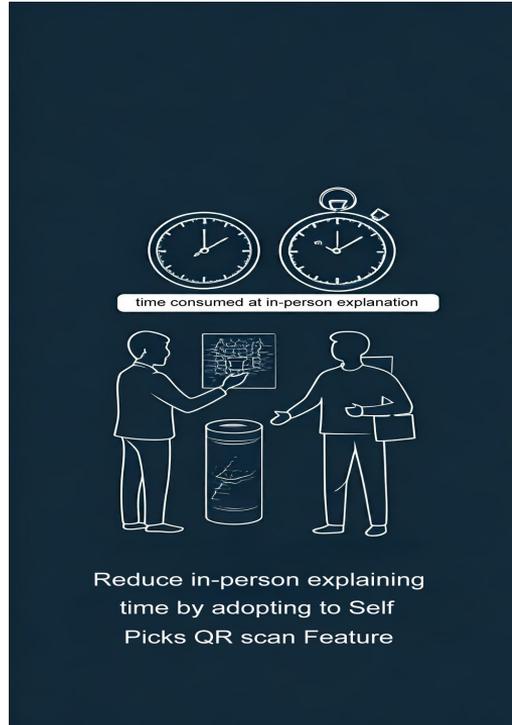

- **Seamless Product Access:**

1. With Self Picks feature product, Visitors will be able to easily scan products Without any attendees.
2. Visitors will be able to check products In detail without needing to explain it.
3. Visitors can add notes to their Self picks And later can inquire more details with Exhibitors.

● Time-Saving for Exhibitors:

1. Self Pick tools saves time
At in-person product
Introduction for exhibitors.
2. It allows visitors to interact
With more products in
Limited time.

- **Valuable Insights:**

1. Self Picks tool can Generate various product Analytics based on Product Interactions.
2. Based on these Analytics Exhibitors can infer Product decisions to Improve sales.

Self Picks History

With Self Picks History feature, Exhibitors will be able to keep track Of Visitors and their interactions With products. We can check this By following below:

[ITF] dashboard => [Self Picks] Tab => Self Picks History

4. Generating and Displaying QR Codes

Once products are registered, they can be displayed with attached QR code and the data become seamlessly accessible to all checked in users. Below is how you can generate them easily.

Step 1: Login at ITF site

Step 2: Go to Product List page

Step 3: Select Products to be Printed on QR code PDF

Step 4: Print this PDF on A4 QR sticker sheet. Now they are ready to be attached with products to display. All checked in visitor can now just scan the QR attached on product and get the info seamlessly on their phone instead of engaging with exhibitors directly.

We recommend using A-One sticker from Amazon. Please check Below link.

https://www.amazon.in/dp/B07NWTZQC4?ref=ppx_yo2ov_dt_b_fed_asin_title

This Sticky QR code chit sheet can Print 65 Products QR code. Our feature is compatible with this sheet.

*It is also possible to Print on normal A4 paper. You can cut each QR code and attach them to products.

Good to go. Happy scanning

Bringing Exhibitors and Visitors closer with seamless digital access to Product catalogues

time consumed at in-person explanation

Reduce in-person explaining time by adopting to Self Picks QR scan Feature

Streamline QR Code scanning

Adopt to Self Picks feature to save in-person explaining time. Also enjoy seamless access to product description and showcasing.

6. Sending Products inquiry emails to visitor:

In a limited time event, It is not possible to inquire and interact with thousand of products in a productive way. With Self Pick tools, user have the means to interact with as many product. They can take the details home and make notes as well as contact corresponding exhibitors.

Exhibitors can connect with visitors via email and send Inquiry replies and quotations.

7. Generating Analytics Reports

Exhibitors get access to various product analytics based on the Self Pick interactions. It can give you great insights that are very useful in making important production related decisions. Below are the benefits of Product Analytics.

1. It shows which products were scanned most
2. It can show which products were least scanned.
3. It displays how many customers visited the exhibition.
4. It shows a graphic representation about the most frequent customers who scanned most products.
